

ROHITH REDDY

DevOps Engineer | Cloud Engineer | Site Reliability Engineer (SRE)

+91 93984 31327 | rohiithh5@gmail.com | linkedin.com/in/rohithreddyhh | github.com/rohithh55 | rohithh75.netlify.app
| Bengaluru, India

PROFESSIONAL SUMMARY

DevOps, Cloud, and SRE-focused engineer with hands-on experience in AWS, Terraform, Kubernetes, Docker, CI/CD, Linux administration, and monitoring. Experienced provisioning AWS infrastructure with Infrastructure as Code, deploying containerized workloads on Amazon EKS, automating CI/CD with GitHub Actions, and implementing Prometheus/Grafana monitoring. Owns and operates DevJops.com, a live production job portal on AWS EKS, with end-to-end responsibility for infrastructure, deployments, scaling, DNS, load balancing, monitoring, and reliability. Immediate joiner; open to relocation and remote work.

CORE COMPETENCIES

Cloud & Infrastructure: AWS (EC2, EKS, ECS, S3, ECR, VPC, IAM), Terraform, Docker, Kubernetes

CI/CD & Automation: GitHub Actions, Jenkins (fundamentals), Deployment Automation

SRE & Observability: Prometheus, Grafana, Monitoring, Incident Troubleshooting, Root Cause Analysis

Systems: Linux (Ubuntu, CentOS), Bash, Python, Git

PROFESSIONAL EXPERIENCE

DevOps Engineer Intern

May 2026 – Aug 2026

LeMiCi IQ Pvt. Ltd. — Bengaluru, India

- Assisted in transitioning manual Infrastructure-as-Code (IaC) provisioning into automated deployment pipelines, reducing manual intervention and streamlining execution times.
- Configured automated drift detection to monitor deployed infrastructure, helping identify configuration divergences and flag unexpected cloud resources.
- Integrated automated security scanning and manual approval gates into the deployment pipeline to catch IaC misconfigurations and authorize production changes before release.

DevOps / Cloud Engineering Intern

Dec 2024 – Aug 2025

Accenar Technologies Pvt. Ltd. — Hyderabad, India

- Provisioned AWS infrastructure including EC2, S3, VPC, IAM, and ECR using Terraform Infrastructure as Code (IaC).
- Containerized applications using Docker; created Dockerfiles and managed image build and push workflows with Amazon ECR.
- Administered Linux servers running Ubuntu and CentOS, including user management, SSH key management, cron jobs, and log analysis.
- Supported Prometheus and Grafana monitoring for infrastructure visibility and assisted with CI/CD pipeline setup using GitHub Actions.

KEY PROJECTS

DevJops.com — Production Job Portal | AWS EKS

- Built and operate a full-stack React/Node.js job portal deployed on Amazon EKS in ap-south-1, with live production ownership.
- Provisioned AWS infrastructure using Terraform, including VPC, EKS cluster, node groups, S3, IAM, and ECR.
- Automated CI/CD using GitHub Actions: Docker image build → Amazon ECR push → Kubernetes deployment.
- Implemented Prometheus and Grafana for cluster and application monitoring, alerting, and observability.
- Managed DNS, load balancing, and auto-scaling configuration to support application availability under real user traffic.

Self-Healing Kubernetes SRE Project

- Designed Python and Bash automation to detect unhealthy Kubernetes pods and trigger remediation, reducing manual recovery effort.
- Implemented Prometheus and Grafana for monitoring, alert visibility, and Kubernetes reliability tracking.

TECHNICAL SKILLS

Cloud: AWS (EC2, EKS, ECS, S3, IAM, VPC, ECR)

Infrastructure as Code: Terraform

Containers & Orchestration: Docker, Kubernetes, Amazon EKS, Helm

CI/CD: GitHub Actions, Jenkins (fundamentals)

Monitoring & Observability: Prometheus, Grafana

Linux & Systems: Linux, Ubuntu, CentOS, SSH, Cron, Log Analysis

Scripting: Python, Bash, Shell Scripting

Networking & Security: AWS VPC, Subnets, Security Groups, IAM, Load Balancing

Version Control: Git, GitHub

EDUCATION

Bachelor's in Computers — Graduated 2025

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate — In Progress
- Certified Kubernetes Administrator (CKA) — In Progress

KEY SKILLS

DevOps Engineer, Cloud Engineer, Site Reliability Engineer, SRE, Platform Engineer, Infrastructure Engineer, Systems Engineer, DevOps, Cloud Infrastructure, AWS, Amazon Web Services, EC2, EKS, ECS, S3, ECR, VPC, IAM, Security Groups, Subnets, Load Balancing, Auto Scaling, High Availability, Kubernetes, Container Orchestration, Docker, Containerization, Helm, Terraform, Infrastructure as Code, IaC, CI/CD, Continuous Integration, Continuous Deployment, GitHub Actions, Jenkins, Build Automation, Deployment Automation, Release Automation, Linux, Ubuntu, CentOS, Bash, Shell Scripting, Python, Cron, SSH, Log Analysis, Performance Tuning, System Administration, Prometheus, Grafana, Monitoring, Observability, Alerting, CloudWatch, Self-Healing Automation, Incident Management, Incident Troubleshooting, Root Cause Analysis, RCA, Reliability Engineering, Cloud Automation, Cloud Security, Security Scanning, Drift Detection, Configuration Management, Git, GitHub, Version Control, Networking Fundamentals, Scripting, Automation Engineer
